

Here are Solutions:

Stop playing games with people and tell them the truth about what you are doing.

Tell them you are working with a group of people who are co-operatively working together to create a better life through crowd clout (Buying Power).

Tell them your group contracts with manufacturers, formulators and vendors and all your group does is buy stuff.

The bigger the group gets, the more products we'll get and the better deals we'll get. And the more money everyone makes.

We're just a group of people who are willing to buy stuff to make money!

Look for the Builders and sign up the buyers along the way, meeting the needs of the consumers as you go by leading with the questions on the front of this brochure.

The Builders will not have a problem telling you what they want and why they want it and they will have also tried many things to get their dreams.

Facts and Pains:

Network Marketing is a method of making money that works best with a lot of people all doing a little bit of stuff (buying).

Since you need a lot of people to make a lot of money in Network Marketing, you'll have more success going after the non-sales type people (because there's a lot more of them) than going after sales people.

If you lead with the product you'll look like a sales person and people might buy your stuff but they won't want to join you because they are not a sales person.

Builders — Buyers — Consumers

Consumers represent 80% of the marketplace but they'll only generate 20% of your sales. The Buyers represent 16% of the marketplace and they'll generate 16% of the sales.

And the Builders represent only 4% of the marketplace but they'll generate 64% of the sales.

Most people fail in this industry because they spend too much time with the wrong group. (Consumers)

Emotions Move People To Act

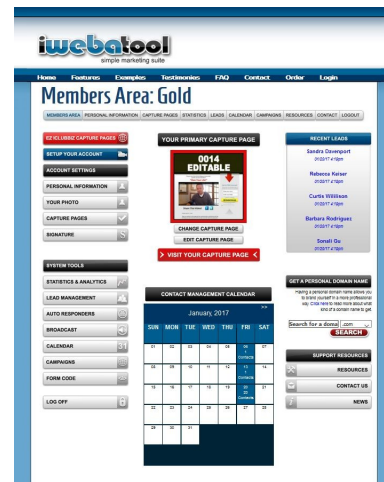

Quality decisions are made emotionally and then backed up with logic. Success in Network Marketing does not come from an intellectual exchange; it comes from a transference of a feeling.

Most people fail in this industry because they spend too much time trying to logically justify the industry.

Tools Increase Speed And Efficiency

Network Marketers who use tools will grow faster with less effort and stress. And what they build will last because tools are dependable, consistent and they work without prejudice.

Most people fail in this industry because they think they have to know everything before they begin and by the time they know everything, the opportunity has passed them by.
